

## 6 STEPS TO ENSURE A HEALTHY SCHOOL YEAR

A safe and healthy start for the 2020-2021 school year is our top priority for all students and staff.

1

### SMALL CLASS SIZES

Class sizes of 15 students or less will enable students to learn safely inside and outside the classrooms. Teachers will hold many classes outdoors and students will have multiple recess opportunities throughout the school day.

2

### ULTRAVIOLET PURIFIERS

Advanced ultraviolet ionizing purifiers and filters have been installed on all HVAC systems around the campus to ensure the air indoors is as clean as possible.

3

### FACE COVERINGS

Disposable and reusable cloth masks will be provided to all students and faculty members. Face shields will also be available for use in the labs and as deemed necessary.

4

### SANITIZERS, SOAPS, AND THERMOMETERS

Gel hand sanitizer packs and hand soaps will be readily available in all classrooms and around campus. Infrared thermometers will be used on a daily basis to monitor the health of all students and staff.

5

### SOCIAL DISTANCING

Pool noodles will be used as a fun way to remind students about safe distancing. Students and staff will maintain a safe 6 feet apart in the classrooms and all around campus.

6

### CAMPUS CLEANINGS

Professional cleaning crew to provide daily cleaning and sanitizing of all classroom spaces. Routine nightly deep campus cleanings will continue every day.
